FARGEOT LAMELLÉ COLLÉ
SATOB CONSTRUCTION BOIS

arbonis®
alponis®

Arbonis is now one of the key players in Wood design and construction through the work of its 4 Companies.

Our Strengths:

- 300 members of staff
- 60 million euros of sales
- 3 production sites
- 6 agencies
- 30 sales engineers
- 3 engineering and design departments covering both on-site and preliminary work

A Leader on the glued-laminated timber market with FARGEOT LC and CAILLAUD LC, our Comprehensive Solutions are also delivered by SATOB CB, which specialises in roof structures, wooden framework and derivative products. Finally, the fourth compagny, ARBONIS Construction, works to develop new Markets for our Comprehensive Wood Solutions, ensuring ARBONIS' presence in every possible line of business.

Every day, there are nearly 300 people, spread over 3 production centres, various sales agencies, and, of course, the sites themselves, working to develop ARBONIS' position both in France and abroad.

Our strategic development process benefits from all our Wood capabilities, including skills from every one of our professional sectors, as well as our internal engineering and design departments to optimise projects or studies with solutions using just wood or a mixture of materials, combining wood with other products.

Global Wood Solution for France and for Export

We therefore offer comprehensive solutions, for the new Industrial Building, Housing, Business Office, Health Facility and Public Building markets, benefiting from a favourable environmental and political climate.

We can therefore become involved as a Designer-Constructor from day 1 of the offer process, proposing alternative solutions which combine our full range of skills.

Arbonis is now a true partner in the development of Comprehensive Wood Solutions, demonstrating, through its many finished works, the relevance of this material and the many benefits of working with us.
